SUMMARY

Full stack web developer with public relations education and a certificate in full stack development from University of California Irvine, with an understanding of Javascript, CSS, Node.js, MySQL, Express, MongoDB, and React while still looking to expand my knowledge base. Hard-working problem solver that keeps the client experience first throughout development and welcomes a team environment. Recently developed a road trip planning application with four other team members and implemented the database functionality. Looking forward to being a driven member of a quality first team that can provide user approved web experiences.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, React, Express, MongoDB, Node Js.

Applications: VS Code, Heroku, GitHub, Mongo Atlas

PROJECTS

Inventory Tracker | github.com/spencer-alan/project-3 | <https://shelf-keeper.herokuapp.com/>

- Website application that allows users to have their own dedicated inventory management page.
- Responsible for the backend Express server set up, Mongoose controllers for the database and the JsonWebToken implementation on the application. Helped make some of the React components for the front end.
- MongoDB, Express, React, Nodejs, Mongoose, JsonWebToken, Yarn, JotForm

RoadTrip Planner | github.com/spencer-alan/project-2 <https://calm-hamlet-11643.herokuapp.com/>

- Note taking website that allows users to make notes about the state they have visited.
- Responsible for the back-end development
- NodeMailer, Dotenv, Heroku, Bootstrap, jQuery, Handlebars, Sequelize, MySQL/JawsDB

Recipe Website | github.com/spencer-alan/project-1 <https://spencer-alan.github.io/project-1/>

- Cookbook website that has search functionality to API resources to populate the page.
- Responsible for the making the backend API calls and formatting the home page
- HTML, CSS, Javascript, JQuery, Slick, Materialize Framework
